

## Playworld Systems Environmental Policy

Playworld Systems, Inc. is a manufacturer of recreational equipment which is shipped world wide. We are committed to managing health, safety and environmental matters as an integral part of our business. In particular, it is our policy to assure the health, safety and environmental integrity of our processes and facilities at all times and at all places. We will do so by adhering to the following principles:

### **Compliance:**

We will comply with applicable laws and regulations and will implement programs and procedures to assure compliance. Compliance with health, safety and environmental standards will be a key ingredient in the training, performance reviews, and incentives of all employees.

### **Risk, Reduction, Prevention, Resource Management:**

We will seek opportunities, beyond regulatory compliance requirements, for reducing risk to human health and the environment, and we will establish and meet our own health, safety and environmental quality standards where appropriate.

We will employ management systems and procedures specifically designed to prevent activities and/or conditions that pose a threat to human health, safety or the environment.

We will look for ways to minimize risk; protect our employees; and minimize releases to the air, land or water by employing clean technology, including safe technologies and operating procedures, as well as being prepared for emergencies.

We will minimize the amount and toxicity of waste generated and will ensure the safe treatment and disposal of waste.

We will manage resources, such as water, energy, and land, in an environmentally sensitive manner.

### **Communications:**

We will communicate our commitment to health, safety and environmental quality; and to our company's environmental performance; to our employees, vendors, customers and to the general public.

### **Continuous Improvement:**

We will measure our progress at least annually by reviewing our aspects, impacts, objectives and targets. We will continuously seek opportunities to improve our adherence to these principles and to improving our environmental performance.
